SUMMARY

AI Engineer specializing in **agentic systems, RAG pipelines, and LLM fine-tuning**. Experienced end-to-end — from dataset creation and model fine-tuning through to production deployment of agents and chatbots. Background in Mechanical Engineering.

SKILLS

Programming	Python, SQL
Frameworks	PyTorch, TensorFlow
LLM & Agent Engineering	LangGraph, LangChain, Dify, tool/function calling, multi-step agents, conversation memory, dynamic routing, specialist handoff, ReAct-style workflows, MCP, prompt optimization, guardrails, agent evaluation
RAG & Retrieval	FAISS, Weaviate, custom chunking, reranking, citation-aware retrieval, source-grounded Q&A, vector search, RAGAS, DeepEval
Model Engineering & Fine-Tuning	Hugging Face Transformers, Qwen, Gemma, QLoRA/LoRA, PEFT, bitsandbytes, Unsloth, Weights & Biases, quantization
NLP	Sentiment analysis, text summarization, question answering, text generation, translation, spaCy
Production AI & LLMOps	FastAPI, OpenAI-compatible APIs, streaming responses, vLLM serving, token/cost tracking, caching, structured logs, tracing, health checks, systemd deployment, latency optimization, regression checks, MLflow, CI/CD, Docker, Git, GitHub, Linux
Data & ML	NumPy, Pandas, Matplotlib, anomaly detection, scikit-learn
Databases	Elasticsearch, vector databases, PostgreSQL, Redis

EXPERIENCE

Generative AI Engineer · [Houshyar24](#)

Aug 2025 – Jun 2026

- Designed and implemented end-to-end AI agents and chatbots using Python, PyTorch, LangChain, LangGraph, FastAPI, Elasticsearch, Unsloth, and low-code/no-code frameworks
- Built reliable, production-ready agents and chatbots on both open-source and closed-source LLMs across a wide range of use cases
- Built and curated domain-specific, production-ready datasets; fine-tuned LLMs and trained BERT-based models to improve task-specific performance
- Developed retrieval-augmented generation (RAG) systems for customer support and designed AI-powered workflows to automate client tasks
- Built comprehensive SMS content moderation systems
- Improved and implemented new features for the Houshyar platform

Generative AI Engineer · [Arman Hoosh Sharif](#)

Apr 2025 – Aug 2025

- Designed and implemented end-to-end agents and chatbots with Python, LangChain, LangGraph, FastAPI, and FAISS
- Built agents and chatbots on both open-source and closed-source LLMs
- Delivered reliable, accurate agents for companies' customers

EDUCATION

Sahand University of Technology

B.Sc. Mechanical Engineering

LANGUAGES

English — Advanced
